WO 2004/031278 PCT/CA2003/001518

## Claims:

5

10

1. A substantially gel-free compound comprising:

a. at least one elastomeric polymer without any conjugated aliphatic diene in its composition having an average molecular weight M<sub>n</sub> of more than 20,000 g/mol comprising repeating units derived from at least one C<sub>4</sub> to C<sub>7</sub> isomonoolefin monomer, at least one multiolefin cross-linking agent and at least one chain transfer agent, said polymer containing less than 15 wt.% of solid matter insoluble in boiling cyclohexane under reflux for 60 min,

- b. at least one filler and
- c. optionally at least one diluent.
- 2. The compound of claim 1, wherein at least one of said elastomeric polymers comprising repeating units derived from at least one C<sub>4</sub> to C<sub>7</sub> isomonoolefin monomer, at least one multiolefin cross-linking agent and at least one chain transfer agent, said polymer containing less than 15 wt.% of solid matter insoluble in boiling cyclohexane under reflux for 60 min, is partially vulcanized.

20

30

- 3. The compound of any of the claims 1-2, wherein the compound further comprises a diluent.
- 4. A self-supporting shaped article comprising a substantially gel-free compound comprising:
  - a. at least one elastomeric polymer without any conjugated aliphatic diene in its composition having an average molecular weight M<sub>n</sub> of more than 20,000 g/mol comprising repeating units derived from at least one C<sub>4</sub> to C<sub>7</sub> isomonoolefin monomer, at least one multiolefin cross-linking agent and at least one chain transfer agent, said polymer containing less than 15 wt.% of solid matter insoluble in boiling cyclohexane under reflux for 60 min,
  - b. at least one filler.

WO 2004/031278 PCT/CA2003/001518

5. An article according to claim 4, wherein the C<sub>4</sub> to C<sub>7</sub> isomonoolefin monomer(s) are selected from the group consisting of isobutylene, 2-methyl-1-butene, 3-methyl-1-butene, 2-methyl-2-butene, 4-methyl-1-pentene and mixtures thereof.

- 6. An article according to any of claims 4-5, wherein the article further comprises at least one supporting means on which the compound is layered.
- 7. A tape comprising the compound of any of the claims 1-3 and optionally one or more supporting means.
  - 8. A sealant or adhesive composition comprising the compound of any of the claims 1-3.
